monitorImpresion

Felix Rodriguez Pericacho

December 2019

1 Ejercicio 1

```
monitor impresora
i,impresoras:integer
libre:array[0..2] of boolean
imp:condition
procedure pedir_{i}mp(varn:integer)
begin
if impresor as == 0 then wait \\
n := 0
while(!libre[n])don := n+1
libre[n] := false
impresoras - -
end
proceduredejar_{i}mp(varn:integer)
begin
libre[n] := true
impresoras + + \\
send(imp)
end
begin(*inicializacion*)
fori := 1 to 3 do
libre[i] := true
impresoras := 3
end
```
